

30 September 2022

Swiss Life Investment Foundation Infrastructure Global ESG (CHF hedged)

Net Asset Value (NAV) in CHF (m): 80.21
Net asset value per entitlement in CHF: 106.89

Management Commentary and Outlook

The Infrastructure Global ESG (CHF hedged) investment group invested a further approx. EUR 26.8 million in the Infrastructure Global (EUR) investment group, which allocated around EUR 61.5 million to additional investments in the reporting period. These comprise two direct investments (co-investments) in the transport and renewable energy sectors. For this purpose, the target fund FONTAVIS SCS SICAV-RAIF– Fontavis ESG Renewable Infrastructure Fund II was subscribed for the first time. Capital calls via target investments by the Infrastructure Global ESG (EUR) investment group amounted to a total of EUR 78.2m. In addition to broad diversification, the portfolio posted a very good performance in the past reporting period in spite of the still ongoing build-up phase. Portfolio Management expects several capital calls from the investment group's investors in Q4 2022. Furthermore, the subscribers of the second period will be called up for the first time in Q4.

Investment Strategy

Acquisition of claims in the Infrastructure Global ESG (EUR) investment group and performance of currency hedging to mitigate the resulting foreign currency risks. The investment group maintains the liquidity required for currency hedging. The investment income of the EUR asset class is generated through investments in infrastructure investments. A conservative to balanced risk/return spectrum is to be covered. (See prospectus for the Infrastructure Global investment group ESG (CHF hedged), point 2.3).
